

Winnen's Kennels

HEALTH REQUIREMENTS

We require a copy of a written exam / health certificate that was performed within seven days of expected arrival from a licensed Veterinarian with the following requirements:

- Fecal test negative for coccidia, giardia, worms and other internal parasites.
- Blood test negative for heartworms/ehrlichia/lymes and be currently taking heartworm preventative medications (last dose within 30 days). Bring a three-month supply of heartworm preventative.
- Record of current 7-way vaccines including Corona, Lepto, Rabies, Lymes and Bordetella.
- Record of current annual Rabies Vaccination.
- If your dog had fleas when you took it to the Vet, we require tapeworm treatment.
- All dogs must be tested for Brucella by your Vet, regardless of spay or neuter! The test must be within 30 day of arrival to our kennel. RSAT and TAT testing have a great number of false positives, therefore, we recommend ELISA testing.
- Females should be at least three months away from expected heat cycle or at least one month beyond their last heat cycle before sending her to us for training.

**THESE REQUIREMENTS MUST BE IN WRITING, SIGNED OFF BY A
LICENSED VETERINARIAN.**
